As President of the Electrical and Computer Engineering Department Heads Association (ECEDHA), I am proud to see our Association leading the path for the advancement of ECE. Over the last several years, ECEDHA has significantly expanded its resources to enable targeted initiatives in areas of community, branding, diversity, communications, and curriculum that have been designed to make significant impacts on the future of ECE.

Although led by department heads and chairs, the scope of our organization has continued to expand to include academic leaders, faculty members, lab professionals, communicators, students, and leaders from industry. Together we are working to embrace and support the ECE community as a whole. Through these efforts, ECEDHA has emerged as a major driving force committed to advocating for the future of ECE.

The most recent success of our diversity workshops, iREDEFINE and IEC (Inclusive Engineering Consortium), held in collaboration with IEEE-HKN and NSF, have reinforced our organization’s commitment to success in diversifying our field. Our efforts in branding have brought together ECE communicators from over 20 institutions, a group that continues to grow and strengthen its network each year. In the last year, we’ve welcomed lab professionals from over 30 institutions, with dedicated programming and ECE Lab Demo Suites, which highlight the latest innovations and technologies from industry.

This membership brochure includes an overview of the latest association initiatives and benefits, as well as the 2018 ECEDHA Financial Report approved by the Audit Committee. Our Finance Committee is currently working on a budget plan for the 2019-2020 fiscal year. And, a membership committee will soon be instituted to enhance engagements among our members, ECEDHA regional and national organizations. With your continued support, these committees, along with the ECEDHA Board, will work to elevate the operation, transparency and membership service of ECEDHA as a leading professional organization.

I invite you to learn more about all our efforts that have been instrumental in changing the face of the organization and its overall mission of academic service and industry collaboration. ECEDHA is your organization, and it can only be effective when its membership is actively engaged. If you have not become involved already, I encourage you to do so.

We look forward to serving you and your institution in the 2019-2020 academic year with your support and participation.

Warmest Personal Regards,

Zhihua Qu
President, ECEDHA

Over the last several years, ECEDHA has undergone a significant investment in branding. As a direct result of this initiative, we are pleased to present a new, modern ECEDHA logo, unveiled during the 2019 ECEDHA Annual Conference and ECEXpo. The new ECEDHA logo will serve the organization well as we strive for innovation and excellence in the future of ECE.
ECEDHA has made great strides in embracing the entire ECE academic community. This past year, we have seen our enhanced membership benefits provide resources not only to the department chairs, but to ECE departments as a whole. The tremendous support received from our ECEDHA members in the implementation of the new membership dues structure has allowed us the necessary funds to drive several important initiatives critical to the future of ECE.

- Increased programming and services for ECE department heads, faculty members, lab professionals, communicators, students, and industry partners.
- A stronger focus on diversity in ECE with dedicated workshops. The iREDEFINE Workshop focused on motivating and preparing graduate women and underrepresented minority students to pursue faculty positions in US universities while the IEC Workshop brought together HBCU program representatives to discuss growing and sustaining a successful collaboration by developing and implementing experimental-centric pedagogy.
- A dedicated graduate student program, held in partnership with IEEE-HKN, designed to prepare the HKN graduate student members to pursue a career as a working engineer in the industry.
- A dedicated rebranding effort designed to raise visibility of the ECE field to prospective students and the general public. With the support of Tailfin Marketing, this initiative has brought together ECE communications and public relations specialists from member institutions to create creative concepts, a marketing toolkit, and implementation plan that can be used by all ECEDHA member institutions.

The Electrical and Computer Engineering Department Heads Association (ECEDHA) is the premier academic association of its kind encompassing all major electrical engineering, computer engineering, and related programs at universities across North America.

ECEDHA is the leading association for electrical and computer engineering educators, composed of nearly 250 ABET accredited ECE university department heads or chairs from across the United States and Canada.

ECEDHA’s mission is to catalyze the fields of electrical and computer engineering through member interaction and exchange. ECEDHA actively promotes industry relations and linkages through its Annual Conference and ECEXpo, industry spotlights, and government sponsored grants and workshops.

Membership

ECEDHA membership is open to official leaders (whether called head, chair, or some other title) of university departments offering ABET-accredited electrical and/or computer engineering (or similarly named) programs. Associate membership in ECEDHA is open to the leaders of similar departments whose programs are not currently accredited. Of nearly 250 departments offering such programs, over 97% are currently represented in ECEDHA.

Affiliate membership in ECEDHA is granted by the ECEDHA Board of Directors to industrial and governmental organizations with a strong interest in electrical and computer engineering education.

New this year, a membership committee has been established to enhance engagement among our membership. It will be led by the President of the association and will also include representation from each region, through the regional leader.
ECEDHA is governed by a Board of Directors consisting of four elected officers: President, Vice-President, Secretary, and Treasurer, the Past President, and Members-at-Large.

ECEDHA conducts many programs and develops relationships with various organizations to advance the disciplines of electrical and computer engineering.

ECEDHA is continually focused on developing relationships with similarly focused organizations. These partnerships allow for greater collaboration among various communities within the ECE field, and help to affect positive change.

**National Science Foundation**

The National Science Foundation (NSF) is an independent federal agency created by Congress in 1950 “to promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense...” NSF is vital because we support basic research and people to create knowledge that transforms the future.

ECEDHA is honored to work with the National Science Foundation on presenting topical workshops of interest to the ECEDHA membership. Past workshop topics include the following:

- Energy and Power
- Nanotechnology
- Curriculum Development
- Globalization
- Branding

In addition, NSF has called upon ECEDHA for educational program development and assistance in producing special workshops of its own, including:

- 2019 Inclusive Engineering Consortium (IEC) Workshop at ECEDHA
- 2019 Inclusive Engineering Consortium (IEC) Summer Workshop
- 2018 UMI Workshop
- 2017-2019 Diversity: iREDEFINE Student Workshop
- 2016 Strategic Shaping of ECE: Vision, Branding, and Advocacy Workshop
- 2013 National Science Foundation Sustainable Energy Pathways Meeting
- 2013 NSF Workshop on Future Directions in Wireless Networking
- 2012 Cyber-Physical Systems Principal Investigators’ Meeting

**PARTNERSHIPS AND ALLIANCES**

ECEDHA has formed valuable alliances to advance the academic engineering community and support other important organizations.
The Electrical and Computer Engineering Department Heads Association (ECEDHA) is an industry leading academic association comprised of nearly 250 ABET-accredited ECE university department chairs from across the United States and Canada.

“Forums like the UMI Workshop are helpful to get folks communicating and collaborating effectively. I look forward to working with you, your team and the HBCU/UMI team on future endeavors as well.”

–MICHEL REECE, ASSOCIATE PROFESSOR, MORGAN STATE UNIVERSITY
Throughout its rich history, ECEDHA continues to evolve and adapt based on the needs of academia and industry. To this day, ECEDHA is the only affiliation of its kind serving as the leading association for electrical and computer engineering institutions.

The purpose of ECEDHA, as expressed in the ECEDHA constitution, are threefold:

- Help advance the fields of electrical and computer engineering
- Facilitate member interaction and idea exchange
- Improve communication with the profession, industry, government, and others

For more information, please visit www.ecedha.org

“I have attended the past three ECEDHA meetings because of their sessions addressing the current image of electrical and computer engineering, which is important to me as a communicator for ECE. Being part of ECEDHA is helping me to collaborate with other communicators and professionals in the field to help strengthen the brand. Attracting the best students to ECE is important to society. I am grateful for the opportunity to assist in this important goal.”

—CATHARINE JUNE, ECE COMMUNICATIONS & MARKETING MANAGER, UNIVERSITY OF MICHIGAN
THE ECEDHA ANNUAL CONFERENCE

The ECEDHA Annual Conference and ECExpo is the only meeting of its kind bringing together the largest concentration of ECE department heads throughout the United States and Canada.

Deans and faculty from member universities, local high schools, community colleges, and representatives from like-minded associations also enjoy dedicated programming at the Annual Conference.

Who Attends from Academics?

- Department Chairs
- Associate Chairs
- Lab Professionals
- Communications/PR Professionals
- Deans of Engineering
- PhD & Post Doctoral Students
- Engineering Faculty
- Makers & Robotics Program Directors

What Makes ECEDHA Unique?

- The only gathering of its kind devoted exclusively to addressing the needs of electrical and computer engineering educators
- A unique opportunity to network and discuss the latest trends and advances in professional development, global branding, educational innovation, and shared experiences
- Specialized workshops and sessions focused on key issues facing ECE educators including Diversity, New Chair Orientation and Best Practices, ABET Accreditation and Renewal, Leadership and Training Programs, and more
ECEDHA’S ECEXpo

ECEDHA’s ECEXpo provides high-level interaction with companies who support ECE disciplines, sell products and services into academia, and employ ECE graduates.

The ECEXpo provides the perfect setting to network and conduct business with industry professionals from today’s leading corporations driving innovation. Members will discover the latest advances in ECE technology from the industry’s leading corporations showcasing their products and services.

Who Attends from Industry?

- EDA Companies
- Test & Measurement
- Software Companies
- Semiconductors
- Distributors
- Manufacturers
- Publishers
- Electronics Retailers
- Robotics Companies
- Maker Space Companies

Bringing Together Academia and Industry

ECEDHA offers opportunities for industry to partner with engineering schools as their ECE department heads and faculty strive to gain insight on the latest trends and issues in educational tools, curriculum, and industry requirements for future engineering professionals.
The ECEDHA Annual Conference and ECExpo has a dedicated Program Committee devoted to creating a world-class program for members. The committee assembles regularly to determine session topics, recommend speakers, and organize panels.

The Committee is led by ECEDHA’s Vice President and supported through the Host University program, which provides strong guidance for the ECE regional community.

ECEDHA HOST UNIVERSITIES

ECEDHA is honored to have had the following institutions serve as Host Universities over recent years. The Host Universities participate on the conference Program Committee and assist in the overall direction of the Annual Conference.
Over the past year, ECEDHA has led national discussions to foster a collective voice in the areas of Branding, Communicators, Community, Diversity, Makerspaces, Robotics, Leadership/New Chair Training, and Curriculum to serve as a resource for ECE departments and industry decision makers nationwide.

Dedicated Working Groups in these subject matters deliberate on future challenges led and supported by ECE departments. This effort will have an enormous impact not only across ECE departments, but will have significant economic impact for steering the intellectual capital of ECE departments towards 21st century grand challenges for the nation.

These working groups are staged to create the following:

- **Visioning workshops** on specific national priorities that assemble scientific leaders to develop white papers and roadmaps
- **Leadership and training programs** for ECE researchers and educators, designed to facilitate a diverse workforce
- An [online repository](#), website, event listing, and online community
- **Collaboration with relevant organizations** (e.g. NSF and CCC) in order to develop interdisciplinary and interagency roadmaps
- A broader public understanding of ECE research and its impact

Research and education in ECE has had a profound impact on the economy, creating entirely new industry sectors, thousands of global companies, and hundreds of millions of jobs.

ECEDHA’s Corporate Partners will play a key role in shaping the research conversation, workshops, white papers, and outreach to government partners.
ECEDHA WORKING GROUPS

Branding Working Group:
CHAIR: 
Ashlee Gardner 
Georgia Institute of Technology

The ECEDHA Branding Working Group’s mission is to ensure that prospective students, those who influence prospective students, and the general public have an accurate understanding of the contributions of electrical and computer engineering to society and the exciting opportunities provided by a career in electrical and computer engineering.

Communicators Working Group:
CO-CHAIRS:
Trudi Brown 
North Carolina State University
Jessica MacInnis 
University of Toronto

The ECEDHA Communicator Working Group mission is to strengthen and support the network of PR/Communications professionals within the field of ECE. Dedicated ECE Communicators meetings will allow your institution’s communications and public relations professional to get an in-depth introduction to the branding toolkit and implementation strategies, as well as crucial networking time with peers.

Over the last several years, Catharine June from the University of Michigan and Ashlee Gardner from Georgia Tech formed an ECE Communicators Group and hosted special programming for communicators at the Annual Conference. We were pleased to have quite a few communicators from all over the country attend. In the coming years, we hope to host an even larger group as it is an important time to get your institution’s communicator involved.
ECEDHA WORKING GROUPS

Community Working Group:

CO-CHAIRS:

George Pappas
University of Pennsylvania

Daniel Stancil
North Carolina State University

The ECEDHA Community Working Group’s mission is to investigate the formation of an organization that will create a research and education vision for ECE departments, and act as a liaison between research leaders and policy makers.

Over the past two years, ECEDHA has launched a new initiative on bringing the research community together around big breakthroughs in ECE research but also aligning the ECE community with major national priorities and industrial trends. In this capacity, the ECEDHA-C (C for Community) working group has been talking to the NSF for the past two years in order to create an organization that is analogous to the Computing Community Consortium (CCC). https://cra.org/ccc/. The CCC, established in 2006, has been getting the computing community together and meeting with policy makers in Washington (funding agencies, government organization, science and technology policy makers) in order to promote fundamental discoveries in the broader field of computing but also to align with national priorities. Some major successes of their efforts have resulted in the National Robotics Initiative (NRI), the NSF Cyber-physical systems (CPS) and the Big Data funding at NSF. Such initiatives have impact not only in academic research but have shaped corporate strategy towards AI, IoT, and Big Data.

Curriculum Working Group:

CO-CHAIRS:

Jonathan Bredow
University of Texas at Arlington

Tony Maciejewski
Colorado State University

Truong Nguyen
University of California, San Diego

The ECEDHA Curriculum Working Group’s mission is to create opportunities for educators to learn hands-on topics, approaches to curriculum design, as well as collaborate with other electrical and computer engineering department heads on the challenges and future of curriculum in ECE.

Diversity Working Group:

CHAIR:

Agnieszka Miguel
Seattle University

The ECEDHA Diversity Working Group’s mission is to support a diverse and inclusive environment in the field of electrical and computer engineering and to encourage participation of women and underrepresented minorities. With ECE posed as a major enabler in technological discovery, a more diverse practitioner/educator pool will lead to new perspectives on technological innovation and how that serves society.
The ECEDHA Makerspace Working Group has several goals, including: (1) promote an understanding of the benefits that Making and Makerspace bring to the ECE community, (2) facilitate conversations on how Making can support the ECE brand, and (3) create a robust network of ECE Making supporters, including administrators, chairs, industry representatives, staff, and students.

The ECEDHA New Chairs Working Group’s mission is to provide a forum for discussing concerns and issues that newly appointed ECE department chairs face, and convey best practices developed over many years by management professionals and more experienced chairs.

A comprehensive workshop for new chairs is conducted each year at the annual ECEDHA meeting. In addition, articles are featured in the ECE Source, the monthly newsletter of ECEDHA.

The ECEDHA Robotics Working Group’s mission is to build a community of like-minded ECE educators and professionals and inspire the next generation of robotics leaders by developing a passion for careers in robotics.
ECEDHA AWARDS PROGRAM

ECEDHA is pleased to present four annual awards to honor individuals or corporations with a sustained record of leadership, innovation, and service to the ECE community. All awards are presented in March each year at the Annual Meeting.

2018 ROBERT M. JANOWIAK OUTSTANDING LEADERSHIP AND SERVICE AWARD:

John Peeples, The Citadel, The Military College of South Carolina
Given to an individual with a sustained record of leadership and service to ECEDHA (primary) and to electrical and computer engineering (secondary).

2018 ECEDHA INNOVATIVE PROGRAM AWARD:

John Booske, University of Wisconsin - Madison
Given to individual(s) or department(s) that has (have) created, implemented, and sustained the implementation of a successful innovative program and possibly assisted in the implementation of that program at other institutions.

2018 ECEDHA INDUSTRY AWARD:

Jay Alexander, Keysight Technologies
Given to department(s) or individual(s) in recognition of proactive efforts to increase cultural, ethnic, and gender diversity within the ECE student body and among ECE faculty, that go well beyond and above the normal institutional recruiting practices.

2018 ECEDHA DIVERSITY AWARD:

Pamela Cosman, University of California, San Diego
Given to company(s) or individual(s) in companies in recognition of seminal contributions to engineering education—especially in the ECE disciplines—that go well beyond typical industry-university relations.
The Awards Committee is responsible for administering the ECEDHA awards. The committee is tasked with soliciting nominees, reviewing applications, and selecting award winners. Committee members are drawn from all geographic regions and represent a cross-section of ECEDHA department classifications.
ECEDHA’s ECE Media Program provides year-round channels for ECEDHA members and faculty to stay informed on the hottest topics facing ECE. Members can gain access to complimentary educational sessions and interact with companies that support ECE disciplines and employ their graduates.

**ECE Webinar**

A Professional Resource for ECE Educators

ECE Webinars offer educational training for electrical and computer engineering educators featuring convenient online education covering relevant topics facing ECE faculty.

**ECE Source**

The Leading Resource for the ECE Community

The *ECE Source* newsletter highlights current topics in engineering education, the latest ECE news, association and partner updates, and technology features from leading corporations.

**ECE Insights**

In-Depth Interviews with Industry Executives

ECEDHA Insights feature compelling interviews with executives who are driving the future of ECE in industry.

**ECE Job Postings**

Access to Classified Job Postings

ECEDHA provides a platform for its members to share open positions at their institutions on the ECEDHA website, as well as featured positions in the *ECE Source* newsletter.
ECEDHA Editorial Committee plans and executes each monthly issue of the *ECE Source* to address the most timely and pressing issues facing ECE today.

2019 ECEDHA EDITORIAL COMMITTEE

**COMMITTEE CHAIR:**
Badri Roysam  
University of Houston

**2020 ECEDHA EDITORIAL COMMITTEE**
ECEDHA is invested in growing its ECE community and focusing its efforts on helping to advance the field; facilitating member interaction and idea exchange; and improving communication with the profession, industry, government, and others.

The recent establishment of the ECEDHA Foundation will provide a platform for ECEDHA to further these efforts by providing the funding and support necessary to develop educational programming activities to advance electrical and computer engineering.

ECEDHA's reach includes nearly 9,000 current ECE faculty members from across the United States and Canada. The ECEDHA database is the only one of its kind reaching a targeted concentration of key decision makers, including:

- **500+** ECE Staff Contacts including research staff, online education and distance learning directors, and lab managers
- **300+** Deans from accredited engineering schools
- **360+** ECE Department Heads from accredited institutions throughout the U.S. and Canada
- **7,000+** ECE Faculty Members
- **1,200+** Industry Professionals with careers in ECE

**ECEDHA ANNUAL SURVEY**

The ECEDHA Annual Survey has been part of the ECEDHA program for more than a decade, collecting important comparative benchmark data on enrollments, salaries, graduate stipends, space allocations, graduation statistics, research expenditures, and much more.

ECEDHA's interactive data system allows ECEDHA members to perform custom queries of the survey data while benchmarking against institutions of their choosing.

The ECEDHA Survey remains a unique benefit to its active membership, and provides a convenient resource for chairs and their departments as a whole.
ECEDHA’s regional groups are very important to the overall strength of the organization and to each of its member universities. The regions convene independently throughout the year to focus on state and local funding, technology stimulus and development, regional economic initiatives, and other issues pertinent to their region. Members are encouraged to participate at both a national and regional level.

2019 ECEDHA REGIONAL LEADERS

**CANADA: CHECE/DGEGI**
Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland, Nova Scotia, Ontario, Quebec, and Saskatchewan
REGIONAL LEADER:
